DETAILED ACTION

Inventorship

1. In view of the papers filed November 22, 2005, the inventorship in this nonprovisional application has been changed by the deletion of Hitoshi Shibata and Masaaki Konishi.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.

Response to Arguments

2. Applicant's arguments, see pages 9 and 10, filed November 17, 2005 with respect to Zimmerman not teaching a weld located radially outward of a thick wall portion have been fully considered and are persuasive. The rejection of claims 1-3,6,8-11,13-15, 18, 35, and 36 has been withdrawn.

Allowable Subject Matter

3. Claims 1-3,6,8-11,13-15,18, and 25-37 are allowed.

4. The following is an examiner's statement of reasons for allowance: A fuel injection device having a valve body, a downstream end, a fuel passage, a valve seat, a valve member, an injection hole plate, the injection hole plate having a thin wall portion, and a thick wall portion radially outside of the thin wall portion, such that a portion of the injection hole plate is welded to the valve body or nozzle holder radially outward of the thick wall portion is not known or rendered obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
